

Do you know an exceptional science teacher in your building, district, or region? There is an opening for an alternative or charter school science teacher to work with the best science teachers in the state. An interested candidate would need to be available to attend quarterly meetings in Roseville, as well as the the annual MAAP and MnSTA conferences.

Please contact me directly if you know of someone that might be able to contribute to the Minnesota Science Teachers Association: mhaberman@montevideoschools.org

Thanks much!! M.
